REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the closest prior art of record fails to teach or suggest the method and apparatus for preparing a predetermined sterilized dose of a medical solution having a heat sensitive fluid component, wherein a heat sensitive component is directly mixed with a second component which was heated to a temperature greater than a predetermined sterilization temperature such that upon mixing the two fluid components are at sterilization temperature and maintained there to achieve sterilization of the entire dose. The closest prior art of record does teach utilization of the heat of another fluid, but through indirect heat exchange contact, not intermixing to achieve heat sterilization.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
